

**WACKER
NEUSON**
all it takes!

Equipment Overview

More than equipment.

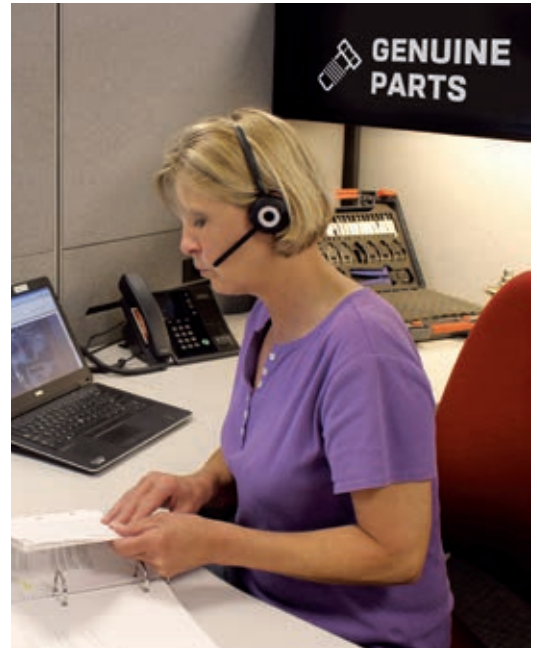

Products are only as good as the service, technical support and training behind them. Wacker Neuson and our network of dealers provide everything you need to keep running at peak performance all season long.

Parts and Service

A breakdown when you're on a tight deadline can cost you time and money — waiting for parts or service is not an option. That's why all Wacker Neuson parts are available via our U.S. distribution center and are typically shipped within 24 hours of your order. You can count on getting the parts and support you need, when you need them.

Technical Training and Support

Wacker Neuson University meets the training needs of dealer salespeople and service technicians, with our virtual or customized in-person training offerings. Or, if you have a specific training need, we can bring the experts to your location. From in-depth industry-focused operation tips and process training to maintenance, our trained professionals can create a tailor-made program for you.

Ask your Wacker Neuson dealer about our warranty and financing programs.

We warranty equipment that operates in your tough conditions to protect your investment. For example, Wacker Neuson's line of material handling equipment features a factory-standard, 24-month/2,000-hour machine warranty.

Ask your dealer about our extended service protection plans. Valid in the USA and Canada.

Flexible finance options: We offer financing and lease programs that help you get the most machine for your money.

- Low down payments
- Zero percent seasonal payment options
- Cash-back options

A single source for reliable solutions.

Wacker Neuson products are used in applications across industries that include construction, agriculture, oil and gas, landscaping, and municipal services. From compaction and concrete technology to industrial and material handling equipment, Wacker Neuson is a global market leader respected for quality, performance and hands-on customer support.

Experience and innovation for 175 years.
