# Pumps

## Trash, Diaphragm, Dewatering

### The right pump for the job

Trash pumps are ideal for fast removal of water with some solid content. Diaphragm pumps are excellent for moving water with mud and slurries. For smaller and clear water removal jobs, the dewatering pumps are both simple and efficient.

### Reliable water removal

Remove water from flooded basements, construction sites and excavations; drain ponds or transport fresh water with reliable engine driven Wacker Neuson pumps.

## Trash Pumps

- Versatile PT series of self-priming centrifugal trash pumps available in 2", 3", 4" and 6" models are ideal for commercial and construction dewatering needs

## Diaphragm Pumps

- Designed to move almost anything that flows, the 2" and 3" PDT diaphragm pumps are built with high quality components to provide years of top performance and durability

## Dewatering Pumps

- Remove clean water fast and economically with the compact 2" and 3" PG self-priming dewatering pumps
